One North County Street
Waukegan, Illinois 60085

Dear Bill

Pursuant to your letter of October 17, 1988 and my phone conversation with Thomas Shuster on October 18 1988 I have reviewed my records and I have the following information

- 1 On March 30 1988, I submitted the site grading plan for Yorkhouse to Howard Chinn as well as boring logs of the Leachate removal wells (copy enclosed) prior to the order of May 25, 1988 This plan also indicated Earth landscaping berms along Yorkhouse Road and along Metropolitan Ave The Park District contracted for the Earth Work and were going to seed the area with Park District Employees
- 2 On June 7, 1988 I talked to Howard Chin by phone about Yorkhouse complaint (see copy of memo)
- 3 On July 1, 1988 I sent 2 copies of the location plan and typical section for the Lateral Movement Monitoring Wells to Howard Chinn (see cover letter)
- 4 On August 12, 1988, I talked to Howard Chinn to find out if he had any problems with the layout and since he did not we proceeded to get approval from the Park District for Boysen to install the Monitoring Wells (see my letter to Shuster, Aug 16, 1988)
- 5 Mr Shuster replied on August 17 1988 to notify Boysen to proceed with the wells Mr Boysens proposal stated that a period of 6 to 8 weeks was required to gather materials which takes us into October I did call Boysen on

Monday October 10, 1988 to find out when he was planning on installing the Wells. He did not answer my call. I called again on October 18, 1988 and he said he will start the end of this week or the 1st of next week to install the wells. He has been very busy this summer lowering pumps in wells to get drinking water for residents due to the real dry summer.

As to the quarterly sampling, I have contacted Mr. Michael Kuhn of the Lake County Health Department who did sample the wells at Adelphi this spring and did not find any deleterious materials in the samples. To establish a quarterly program of monitoring the Wells at both Adelphi and at Yorkhouse under a nominal contract cost and he said that his proposal will probably take 1 to 2 weeks to prepare.

All of the remedial work at Adelphi was completed prior to the May 25, 1988 order in that all the wells were installed, the grading was complete 10 years ago, the ground cover has been well established for a number of years and we have had samples taken in the past. I think that we have complied with the order with the only exception being that we did not have a written plan regarding the Quarterly sampling of the Lateral Movement Wells and that is presently in the works.

I trust that the foregoing is satisfactory for your immediate purposes and I remain

Professionally yours,

Frank J. Furlan
